

Quality Water for All

Ghada El Serafy Director, Netherlands
Merrie Beth Neely Sc. Coordinator, USA

Global Water Quality Initiative for the Group on Earth Observations—international, science-based organization dedicated to **global satellite-based water quality observations for the benefit of society**. We work in freshwater to marine aquatic areas, combining satellite data and water sampling to **inform policy and management decisions**.

Water Quality mapping services: NOAA Coastwatch MSL12 ocean colour gap filled data

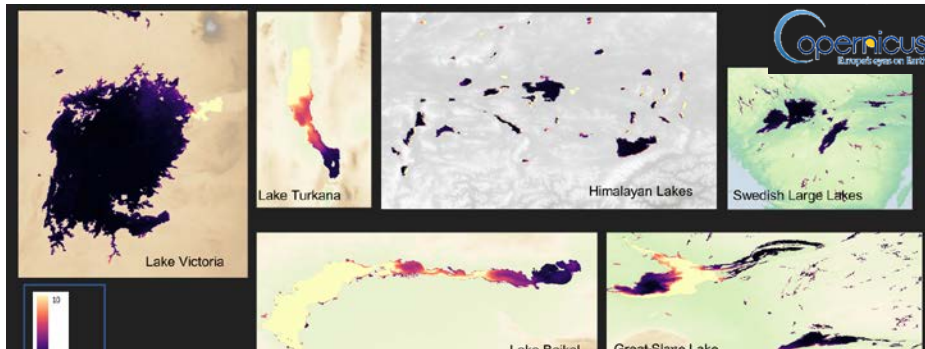

Implementation of aquatic based atmospheric correction for Landsat/OLI and Sentinel-2/MSI

**Global Best Practices
 Fit for Purpose
 Accessible**

Copernicus Global Land Inland Waters

Water Resources Management : Introduce new users to available Earth Observation tools for water
