

**DANUBE DELTA & COASTAL AREA
LANDSEALOT INTEGRATION LAB**

**The Danube Delta hosts one of
Europe's most important breeding
populations of Dalmatian pelicans.**

**DALMATIAN PELICAN
(PELECANUS CRISPUS)**

**TAGUS & SADO ESTUARIES SYSTEM
LANDSEALOT INTEGRATION LAB**

**The Sado Estuary is home to
one of the few resident
bottlenose dolphin
populations in Europe.**

**BOTTLENOSE DOLPHIN
(TURSIOPS TRUNCATUS)**

BALTIC SEA LANDSEA LOT INTEGRATION LAB

Water-filtering blue mussel communities are important for the entire Baltic Sea area.

**BLUE MUSSEL
(MYTILUS EDULIS)**

FIRTH OF FORTH LANDSEALOT INTEGRATION LAB

These migratory fish depend on healthy rivers, estuaries, and coastal waters throughout their life cycle.

**SEA TROUT
(SALMO TRUTTA)**

NORTH AEGEAN LANDSEALOT INTEGRATION LAB

**The North Aegean is
a crucial habitat for
the critically
endangered
Mediterranean monk
seal, one of the
rarest marine
mammals in the
world.**

**MEDITERRANEAN MONK SEAL
(MONACHUS MONACHUS)**

PO DELTA & NORTH ADRIATIC LANDSEA LOT INTEGRATION LAB

Greater flamingos depend on the Po Delta's lagoons, salt marshes, and shallow wetlands for feeding and nesting.

**GREATER FLAMINGO
(PHOENICOPTERUS ROSEUS)**

WADDEN SEA, RHINE DELTA & ELBE ESTUARY LANDSEA LOT INTEGRATION LAB

These underwater plants help stabilise sediments, improve water quality, and capture carbon while supporting biodiversity across the land-sea interface.

**EELGRASS
(ZOSTERA MARINA)**

SEINE ESTUARY & BAY LANDSEALOT INTEGRATION LAB

The shallow coastal waters and tidal flats of the Seine Estuary and Bay provide a crucial habitat for brown shrimp and many other estuarine species.

**BROWN SHRIMP
(CRANGON CRANGON)**

GULF OF LIONS & RHONE DELTA LANDSEA LOT INTEGRATION LAB

The lagoons and coastal wetlands of the Gulf of Lions and Rhone Delta are home to seahorses and other species that depend on healthy seagrass and estuarine ecosystems.

**LONG-SNOURED SEAHORSE
(HIPPOCAMPUS GUTTULATUS)**
