

LandSeaLot Conference LAND-SEA 2026

Cost-effective observing technologies and SCOOP

Emilie Brévière, SMHI

30 Sept 2026

Co-funded by
the European Union

UK Research
and Innovation

LandSeaLot has received funding from the European Union's Horizon Europe Framework Programme for Research and Innovation under grant agreement No 101134575. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or European Research Executive Agency. Neither the European Union nor the granting authority can be held responsible for them. UK participants in Horizon Europe Project LandSeaLot are supported by UKRI grant numbers: 10109592 University of Stirling and 10107554 Plymouth Marine Laboratory.

Cost-effective observing technologies

Big momentum in ocean observation

Envlogger
Temperature

Wavelet sensor

CTD : Temperature, conductivity, depth, light attenuation - sediment concentration proxy

iSPEX2

Remote sensing reflectance (equi. Satellite Obs. -> sediment concentration proxy)

Secchi Disk

Light attenuation – sediment concentration proxy

Solutions for Cost-effective Ocean Observation Platform
